martono martono (Author):

We have reached a decision regarding your submission to Open Access Macedonian Journal of Medical Sciences, "Assessment of the effectiveness of facial expression exercises stimulation using mirror media in increasing facial muscle strength in hemiparetic stroke patients", Manuscript ID = OJS10267.

Our decision is to:Accept your manuscript for publication in OAMJMS.

Reviewer G:

This is a very good paper, of importance to neurology and stroke medicine.

I would suggest some terminological refinement, especially to avoid Latin terms while the entire paper is in English;

For example Table 1:

Parese side (hemiparetic side) dextra (right) sinistra (left): thus omit dextra and sinistra and replace them duly.
